

Job Title: Maintenance Technician

FLSA Status: Union, Non-Exempt

Reports to: Maintenance Manager

Company Background:

Commercial Forged Products was founded in 1874 as the Smith & O'Leary Company Products included artillery shells, motor housings, castings, and farm and truck forgings. In 1946, CFP was renamed Commercial Stamping and Forge and manufactured tunnel supports, tank heads, and miscellaneous forged and steel fabricated products. In 1986, the CFP was sold to Wozniak Industries, Inc. and named Commercial Forged Products. Today, CFP remains a Wozniak Industries division, producing custom-forged parts. Our business extends to the agriculture, truck, truck trailer, off-highway equipment, oil & energy, percussion drill bit, and other industrial markets.

A division of Wozniak Industries, Commercial Forged Products brings to the market 145 years of experience as a contract manufacturer of steel forgings. Over the years, we have increased our technical and manufacturing capabilities to service products in support of many different industries, including off-highway, agriculture, oil/energy, construction, and horizontal directional drilling. Regardless of the product or market, customers can rely on Commercial Forged Products' total focus on quality and delivery. It's this dedication to our clients that keeps us at the forefront of the metal forging industry.

Job Description:

The Maintenance technician will be responsible for inspecting, repairing, installing, and maintaining all machines and facilities equipment. Additionally, the maintenance technician will be responsible for operating electrical and mechanical equipment following best safety practices and procedures.
